
Water Quality Summary Report No. 33

1998 Follow-up Studies to Ground Water Contamination Detections

Idaho Department of Health and Welfare
Division of Environmental Quality
July 1999

of fluoride by geothermal water intrusion in the Crouch/Garden Valley area. The 1998 Ground Water Follow-up Studies showed that the fluoride problem is also found west of Garden Valley and in Horseshoe Bend. A process needs to be developed for getting this information to current well owners and those that are planning to drill a new well in this large area.

ACKNOWLEDGMENTS

I appreciated all the assistance from the staff at IDWR with ground water quality data and well drillers' reports. Thanks to Deb Parlman, USGS, with ground water quality data and Dean Yashan, DEQ, with the ArcView files of the Statewide Ground Water Monitoring data. The State of Idaho Bureau of Laboratories with the analyses. Finally, thanks to Dean Yashan (DEQ), Ron Lane (DEQ-BRO), Rob Howarth (DEQ-BRO), Jennifer Carlson (DEQ-BRO), Dorothy Boggs (DEQ-BRO), Ken Neely (IDWR), Janet Crockett (IDWR), Sandy Hemenway (SWDHD), and Kristin Keith (U of I Cooperative Extension) who reviewed and commented on this work.
